

ADVANCED GRAIN MOISTURE METER

C-PRO – CONNECTS TO YOUR SMARTPHONE

KNOW YOUR MOISTURE CONTENT AND AVOID SPOILAGE

Effective grain storage is essential for ensuring high crop quality and preventing loss of product. Moisture Management is the key to safe storage. C-Pro is a next-generation moisture analyser where we combine the latest technology with our combined built-in grinder and compressor for grain and seeds. We feel safe to say that this is the world's most technically advanced handheld grain moisture meter.

The key functions/benefits are:

- Know the moisture content in your grain and seeds
- Accurate and consistent results
- Easy to use; four easy steps and you are good to go
- Gain vital insights and manage documentation

A complete overview is now yours – even on the go! C-Pro – the pocket-sized digital grain moisture meter that delivers consistent results

C-PRO – DIGITAL GRAIN MOISTURE METER

Keeps track of your measurement history

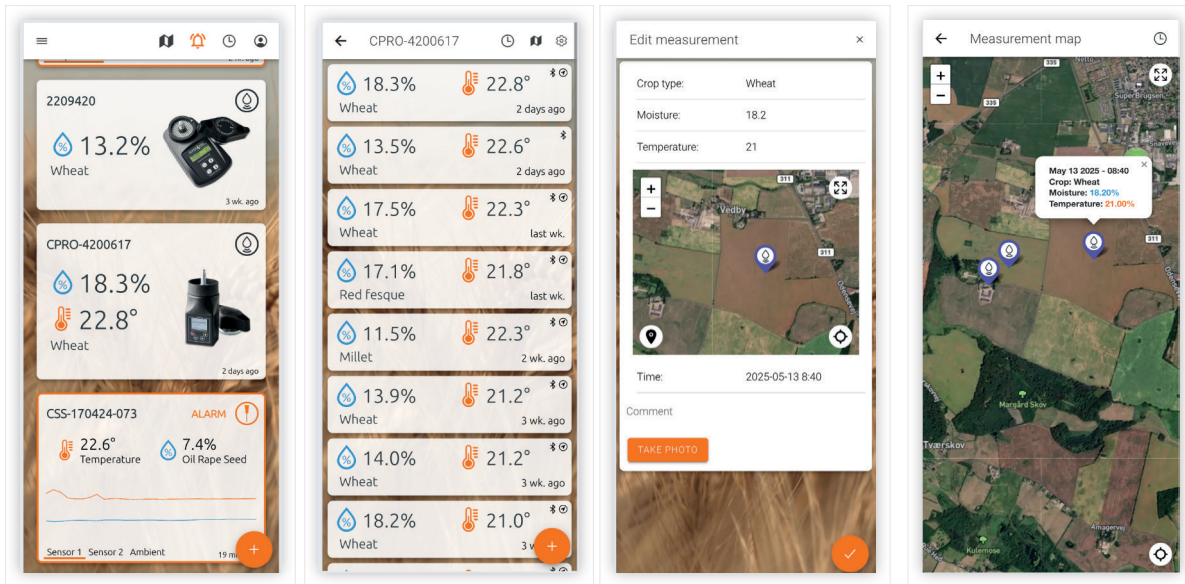

The new C-Pro easily connects to our AgroLog App, allowing you to capture and manage data directly in the field. As you take measurements on-site, they automatically sync to the AgroLog App, helping you keep accurate track of all your registrations and results.

EFFORTLESS MEASUREMENTS, RELIABLE RESULTS

The new C-Pro easily connects to the AgroLog App, allowing you to capture and manage data directly in the field. As you take measurements on-site, they automatically sync to the app, ensuring all your registrations and results are accurately tracked.

Monitor multiple devices, view readings on a map, and use crop-specific presets for precise results. With custom alerts, instant notifications, and multilingual support, the C-Pro and AgroLog App make field monitoring effortless and efficient.

Sync Measurements:
Easily transfer readings from your C-Pro device to the app.

Connect Multiple Devices:
Manage data from multiple C-Pro devices and other compatible products in the app.

Record Timestamps:
Capture the exact time each reading is taken to maintain accurate records.

Add Images & Notes:
Attach photos and notes to each measurement for more context.

Low-Energy Bluetooth:
Efficient wireless connection with long battery life.

Track GPS Location:
Automatically log the exact location for each measurement.

WHAT YOU GET

- Digital Precision
- Integrated Grinding & Compression
- Built-in Measuring Cups
- Automatic Temperature Compensation
- Hardened Steel Grinder
- Shockproof Casing
- Smart Averaging
- Customizable Scales
- Field-Ready Kit
- Modern App Integration
- Two-Year Warranty

C-PRO IS SUPER-EASY TO USE AND HANDLE

C-Pro has an intuitive interface with four simple buttons and a colour display that makes it easy to navigate the menu and make measurements. With the app, you can always access your old measurements, even on busy days when you're on the go.

Turn on the device by pressing the power button.

Put the sample in the grinder and grind. The sample size is measured out in the built-in measuring cup.

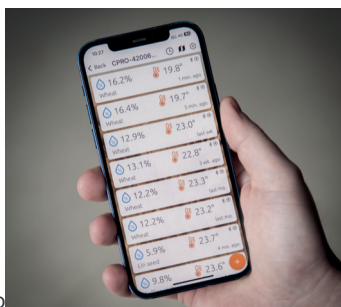

Press the top button and read the moisture content directly from the display.

View the results in the app and compare with recent readings.

View the results in the app and compare with recent readings.

Use the app to add images and notes for documentation.

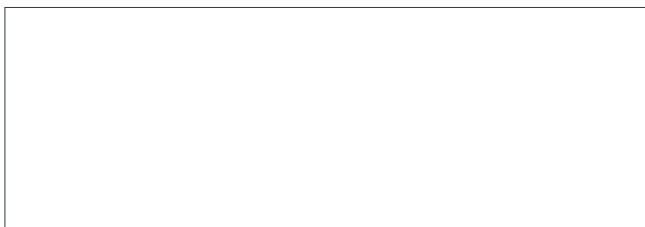

TECHNICAL SPECIFICATIONS

Measuring range (Moisture): 5 to 50% depending on crop type
 Operating range (Temperature): 0 to 50 °C
 Resolution: 0.1% moisture
 Temperature compensation: Automatic
 Weight including case: 1.4 kg
 Dimension: 13x21x8 cm
 Battery: 9 V Alkaline
 Display: High resolution color display
 Accuracy: Better than +/- 0.25% in normal moisture range by using average and calibration adjustments

The name of the C-Pro app is "AgroLog App" and has been designed with user-friendliness at its core. Download the app from Google Play or the App Store. Connect with your device and you are ready to go.

If you need any help, please contact your local dealer or our technical helpdesk.
